

Assignment 02

1. Which field of the Customer table is the primary Key ?

Ans:- Cnum fields of the customer table is primary key.

2.What is the 4th column of the Customers table ?

Ans:- Rating is the 4th column of Customers table.

3.What is another word for row? For Column ?

Ans. Another word For row : Entity, tuple and Another word For column :Attribute ,Method.

4.Why isn't it possible to see the first five rows of a table?

Ans:- RDBMS, rows of table are not stored sequentially When you update a row, if row length is increasing & free space is not available at that location, entire row is shifted to new location.

-Later when you select from that table the row will be in another location,

-In VARCHAR,row length may increase or decrease,common for all RDBMS.

-Hence,seeing first "5" or last "5 " rows of table is not possible
